

BE READY FOR COOLER WEATHER COMING SOON !

Parkland Light & Water Company
Has three ways to keep you warm

#1 Our Ductless Heat Pump program can help reduce your electric utility bills and mitigate seasonal heat changes. The heat pumps provide your home with higher comfort level as the units provide both **heating** and **air conditioning**.

The current incentives are:

- Homes (site built or manufactured homes) with electric baseboard, wall heaters or ceiling cable – the Incentive is **\$1,300**.

In addition, many manufactures have additional incentives to help reduce the cost of installation.

#2 Our Ducted Heat Pump Conversion program for customers who have an existing electric forced air furnace with duct work and want lower heating bills in the winter and the comfort of air conditioning in the summer.

The current incentives are:

Air Source Heat Pump Conversions:

Homes (site built or manufactured homes) with ducted electric forced air furnaces - the Incentive is **\$1,300**.

Variable Speed Air Source Heat Pump Compressor Conversions:

Homes (site built or manufactured homes) with ducted electric forced air furnaces – the incentive is **\$1,500**.

#3 Our Ducted Heat Pump Conversion program (Requires PTCS certification) for customers who have an existing electric forced air furnace or non electric furnace (**oil/gas**) with duct work and want lower heating bills in the winter and the comfort of air conditioning in the summer.

The current incentives are:

Air Source Heat Pump Conversions:

Homes (site built or manufactured homes) with ducted electric forced air furnaces or non electric furnaces - the Incentive is **\$700**

We encourage you to take part in this program now. If you have questions, please call Mike Porter at 1-503-730-3122 or you can reach him via email at mike.porter@evergreen-efficiency.com
